

# Q&A: Captcha-ing Spam

Over the weekend I get hit with 1000+ spam through the Q&A inputs on this blog.

This means, unfortunately, that I have had to implement the inconvenience of including a captcha input to prove the input is from a human.

It also means that if you have posted a question in the last four days I will not receive it as all new Q&A submissions for that period are being deleted.

Thanks,

W.
